Durable system, perfect for any fast paced environment

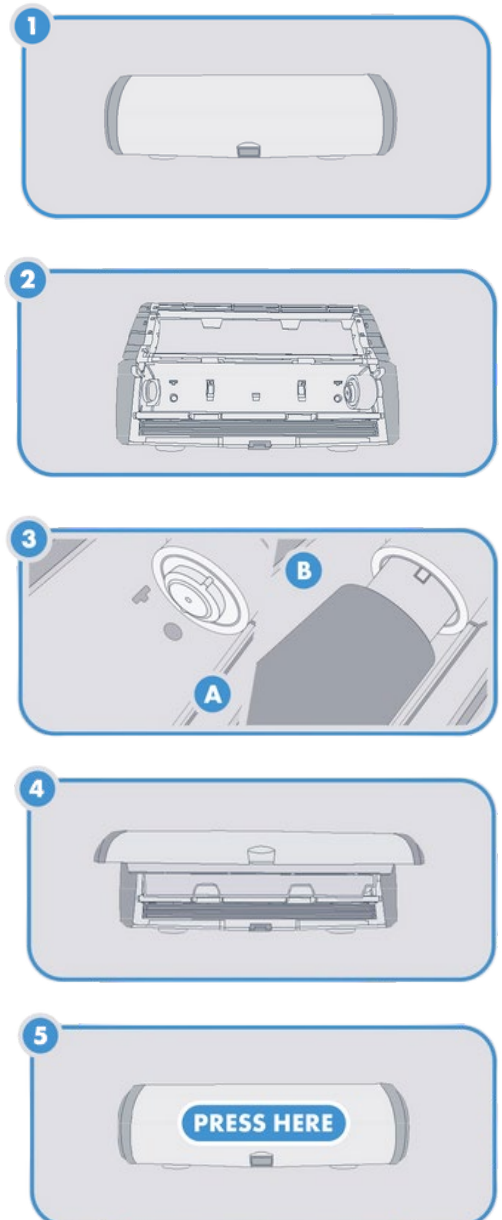

Speedwrap PRO

REFILLS

How to load your chosen refill roll into the Speedwrap Pro Dispenser

- 1 Remove the Speedwrap Pro dispenser from all outer packaging. Open the lid by pressing on the middle of the dispenser unit and then pull the Prowrap grey latch downwards.
- 2 Open the dispenser by pushing the top and inner lid backwards.
- 3 Insert your chosen Speedwrap refill roll into the body of the machine. Use the cut outs located at the end of the roll and align with the widget (A) inside the dispenser unit and gently push into place (B). Next, insert into position at opposite end of dispenser.
- 4 Pull a length of material from the roll. Push inner and top lid back into position so that it covers the refill roll.
- 5 Pull to length and press the lid firmly to cut.

SPEEDWRAP PRO REFILL RANGE

PRO FILMS

The Speedwrap Pro professional cling film range includes a choice of 3 options - available in a standard cling film, PE & ECO cling refill.

Ecocling is the newest addition to our Prowrap range – fully recyclable, with similar stretchability, cutting capability and durability as our professional cling film.

PRO FOILS

Proudly made from recycled content, the Speedwrap Pro infinity range is suitable for any professional catering environment.

Our foil offers quality and value for caterers.

Ideal for all baking & kitchen requirements.

SPEEDWRAP PRO REFILL RANGE

PRO BAKING PARCHMENT

Our silicone coated parchment offers grease free baking and is a great alternative to regular baking paper.

Our extra-wide parchment is the professional caterer's roll of choice.

Ideal for freezer use. 100% biodegradable & compostable.

SAFETY BLADE

New patented safety blade to avoid any cuts in the kitchen.

HYGIENE

Food Hygiene labels included with every dispenser to ensure food hygiene best practice.

Antimicrobial technology for enhanced dispenser protection.

CLEANING

Dishwasher safe lid and base.

OUR PARTNERSHIP WITH BIOCOTE[®]

Our new range of Speedwrap Pro[®] dispensers is protected by BioCote antimicrobial technology.

BioCote[®] is the only HACCP International certified antimicrobial technology supplier.

The market-leading technology ensures the surface of the dispensers can inhibit microbial growth by up to 99.99%.

The technology discourages the growth of bacteria, mould spores, and other microbes on the surface of each dispenser.

Resulting in increased overall efficiency of the Speedwrap range by simplifying and supporting regular cleaning routines.

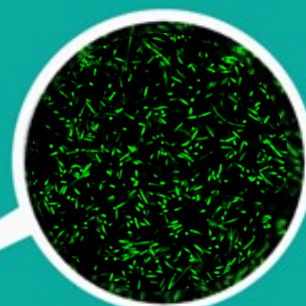

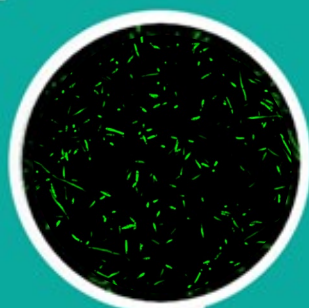

BioCote® in Action

Unprotected Surface

On an unprotected surface, The microbes begin to multiply.

BioCote® protected surface

On a **BioCote® protected** surface, the microbes cannot survive and begin reduce

2-hour time lapse

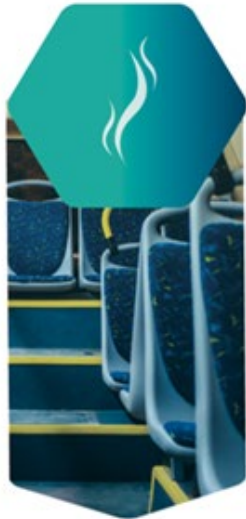

WHAT ARE MICROBES?

Microbes, such as bacteria and fungi can be found almost anywhere and when left untreated can multiply, doubling every 4 to 20 minutes. If left untreated can have a negative impact on the quality of your product.

**Eliminates
foul odours**

**Prevents staining and
discolouration**

**Reduces material
degradation**

**Compliment
cleaning practices**

How BioCote® treated products work on microbes?

BioCote® technology is the solution to microbes multiplying and spreading on surfaces. Our technology disrupts their growth and reproduction, stopping bacteria and fungi from reproducing and replicating.

24/7 Protection
BioCote® technology continuously reduces microbes that degrade products

Effective
✓ Protect against microbes such as mould and fungi by up to 99.99%

Permanent
🛡️ Lasting for the designed lifetime of the product, BioCote® does not wash off or wear out

Proven
🕒 Reduces microbes on protected materials by up to 86% in just 15 minutes
